From the Web

William McSephney is the "go to guy" for implementation of most of the unique or innovative-type solutions undertaken by Sbi. His knowledge and experience in electronics is unsurpassed and augments his IS technical ability in troubleshooting client problems in hardware and software conflicts. Bill acts as a primary resource for other Sbi technologists' vis-à-vis his thorough knowledge of the history of computer and communication network technology and the details of their advancements over the past 29 years. Bill is the consummate team player; an approach that ultimately results in the maximum benefit to the client.

Industry Sector Experience

- Government
